Geomatics Engineer (GIS) | Passionate about turning spatial data into actionable insights. Experienced in ArcGIS Pro for site selection, environmental analysis, and risk assessment. Always exploring innovative solutions to support sustainable urban planning and resource management.

Education

University of Khartoum, Khartoum **10/2017 - 08/2025**
B.Sc Surveying - 7.96 of 10 (frist class)

- Field of study: Surveying Engineering

Professional Experience

University of Khartoum, Khartoum **01/2026 - present**
Cooperative Teaching Assistant

- Assisted undergraduate students in GIS, Surveying (I & II), and Database Management practical sessions.
- Trained students on ArcGIS Pro workflows, spatial data management, and spatial analysis.
- Instructed students in Microsoft Access and Oracle Database design, data management, and SQL queries.
- Supervised practical surveying exercises, including field data collection, measurements, and processing.
- Developed and guided practical exercises, troubleshooting, and real-world applications in geospatial and database systems

Xtreme Capabilities for Engineering , Al Goled, Northern State, Sudan **09/2025 - 11/2025**
Survey Engineering

- Conducted land subdivision and surveying for agricultural areas based on approved master layouts.
- Defined and marked boundaries and corner points for individual agricultural plots with high measurement accuracy.
- Supervised the physical handover of land parcels to clients and beneficiaries.
- Prepared detailed subdivision plans illustrating plot dimensions, areas, coordinates, and identification numbers.
- Performed coordinate verification and quality checks to ensure alignment between field data and approved office drawings.

Key Skills

- Arc gis pro
- Spatial analysis
- Gis application
- Python language

Courses

- Fundamentals of GIS | Coursera (Aug 2024 — Aug 2024)
- Acquired comprehensive knowledge in spatial data management, coordinate systems, and core Geographic Information Systems (GIS) mapping concepts.
- Python | Kaggle (Jul 2024 — Jul 2024)
- Focused on programming fundamentals, data structures, and automation using Python for spatial data analysis and task optimization.
- Intro to Programming | Kaggle (Jul 2024 — Jul 2024)
- Mastered fundamental algorithmic logic, syntax structure, and problem-solving methodologies for software development.
- Claude 101 | Anthropic (Mar 2026 — Mar 2026)
- Explored advanced large language model capabilities, prompt engineering techniques, and AI integration workflows.
- AI Fluency for Educators | Anthropic (Mar 2026 — Mar 2026)
- Studied practical applications of generative artificial intelligence, structured prompt design, and digital workflow enhancements.

Languages

- Arabic: Native / Bilingual
- English: Upper-Intermediate (B2)
